

WeShare Mobile for iPhone Spread Your Word From Anywhere

Description

WeShare Mobile for iPhone is a free software component which allows content such as images, links, text excerpts or comments to be easily published on social media platforms. Written in Objective C, WeShare Mobile is easily configurable and can be quickly and inexpensively expanded to include any existing service by simply writing a plug-in. Currently, WeShare Mobile for iPhone includes plug-ins for Facebook, Twitter, Delicious and e-mail, as well as a demo app.

WeShare Mobile for iPhone can be easily integrated into any existing app. The typical iPhone user-interface, which is seamlessly integrated into WeShare Mobile for iPhone, allows you to register and publish content on various platforms via the "Share" function.

Download

WeShare Mobile for iPhone is free and is hosted on Google Code:

<http://code.google.com/p/wesharemobile>

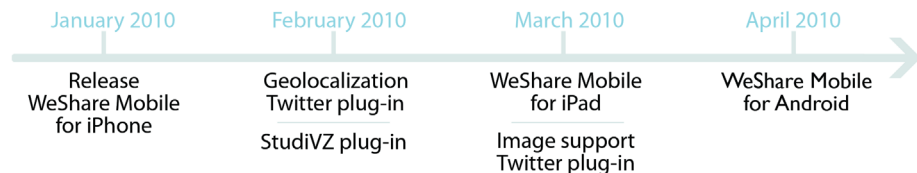

Licensing

WeShare Mobile for iPhone is dual-licensed:

- It can be used free of charge under the condition that the source code of your app will be released (GPLv3).
- A commercial license, which does not require the release of source code from your own app, can be purchased from neofonie. Under the commercial license, neofonie also provides customer support.

Roadmap

Currently in development are a plug-in for StudiVZ, as well as geotagging and Twitter image support plug-ins. In the near future, a WeShare for iPad and for Android Smartphones will be released:
